Skills

Programming

Python, MATLAB

Image data analysis

Monte Carlo Simulations

Geant4, GATE, TOPAS

Projects

Real-time Visual Feedback System

Designed a microcontroller-based respiratory feedback system for reducing motion artifacts in CT.

Intelligent Dose Management System

Developed an AI-driven dose management system for radiotherapy.

Experience

Diagnostische Radiologie UKER

Scientific Staff

2025 - Present

Erlangen, Germany

Strahlenklinik UKER

Doctoral Student

2022 - 2025

Erlangen, Germany

- Surrogate systems in respiratory-guided CT
- Integration of a surface-guided system in intelligent 4DCT
- CT dose & patient specific quality assurance in radiotherapy

Maastrro

Visiting Scientist

2020 - 2022

Maastricht, Netherlands

- Computational and experimental dosimetry with imaging systems
- 3D printing of anthropomorphic phantoms for radiotherapy
- Monte Carlo simulations & computing cluster management

MedAustron

Master Thesis Student

2018 - 2019

Wiener Neustadt, Austria

- RBE-weighted dose computation in carbon ion beam therapy
- Monte Carlo techniques in ion beam therapy
